

Program-wise Learning Outcome

Prosthodontics

Aim:

To train dental graduates so as to ensure higher competence in both general and special area of Prosthodontics and prepare a candidate for teaching, research and clinical abilities including prevention and after care in prosthodontics including crown and bridg-and implantology.

General Objectives of the Course:

1. Training programme in Prosthodontic dentistry including Crown & Bridge & Implantology is structured to achieve knowledge and skill in theoretical and clinical laboratory, attitude, communicative skills and ability to research with understanding of social, cultural, education and environmental background of the society
2. To have acquired adequate knowledge and understanding of applied basic and systematic medical science knowledge in general and particular to head and neck.
3. The postgraduates will be able to provide Prosthodontic therapy for patients with competence and working knowledge with understanding of applied medical behavioral and clinical science that are beyond the treatment skills of the general BDS graduate and MDS graduate of other specialities to demonstrate evaluative and judgment skills in making appropriate decisions regarding prevention, treatment aftercare and referral to deliver comprehensive care to patients.

Knowledge

The candidate should possess knowledge applied basic and systematic medical sciences.

1. On human anatomy, embryology, histology, applied in general and particular to head and neck, Physiology & Biochemistry, Pathology and microbiology, virology, Health and diseases of various systems of the body (systemic) principles in surgery and medicine, Pharmacology, Nutrition, behavioral Science, Age changes, genetics, Immunology, Congenital defects and syndrome and Anthropology, Bioengineering, Bio-medical and Biological Principle and application Dental material science
2. Ability to diagnose and planned treatment for patients requiring a Prosthodontic therapy
3. Ability to read and interpret a radiograph and other investigations for the purpose of diagnoses treatment plan
4. Tooth and tooth surface restorations, Complete denture prosthodontics, removable partial dentures Prosthodontics, fixed prosthodontics and maxillofacial and Craniofacial Prosthodontics, implants supported Prosthodontics, T.M.J, and occlusion, craniofacial esthetic, and biomaterials. Craniofacial disorders - problems of psychogenic origin.
5. Age changes and Prosthodontic Therapy for aged.
6. Ability to diagnose failed restoration and provide Prosthodontic therapy and after care.

Dental Science & Research
NAUBAD, BIDAR-585402
(Karnataka)

7. Should have essential knowledge on ethics, laws and Jurisprudence and forensic odontology in Prosthodontics
8. General health conditions and emergency as related to prosthodontics treatment,
9. Identify social, cultural, economic, environmental, educational and emotional determinants of the patient and consider them in planning the treatment.
10. Identify cases, which are outside the area of his speciality/ competence and refer them to appropriate specialists.
11. Advice regarding case management involving surgical, interim treatment etc.
12. Competent specialization in team management of craniofacial design.
13. Should attend continuing education programmes, seminars and conferences related to prosthodontics in thus updating himself.
14. Teach and guide his / her team, colleague and other students.
15. Should be able to use information technology tools and carry out research basic and clinical, with the aims of publishing his/ her work and presenting hi work at various scientific forum.
16. Should have essential knowledge of personal hygiene, infection control, prevent of cross infection and safe disposal of waste, keeping in view the risks of transfer of Hepatitis & HIV
17. Should have an ability to plan to establish Prosthodontic clinic/hospital teach⁰; department and practice management
18. Should have a sound knowledge for the application of pharmacology. Effects drugs on oral tissue and systems of a body and for medically compromised

Skills

1. The candidate should be able to examine the patients requiring Prosthodontic therapy, investigate the patient systemically, analyze the investigation results, radiography, diagnose the ailment, plan a treatment, communicate it with the patient and execute it.
2. Understand the prevalence and prevention of diseases of craniomandibular system related to Prosthetic dentistry.
3. The candidate should be able to restore the lost functions of the stomatognathic system namely speech, mastication etc to provide a quality health care for craniofacial region
4. The candidate should be able to interact with other speciality including a medical speciality for a planned team management of patients for a craniofacial and oral acquired and congenital defects, Temporomandibular joint syndromes, esthetics, Implant supported Prosthetics and problems of Psychogenic origin,
5. Should be able to demonstrate the clinical competence necessary to carry out appropriate treatment at higher level of knowledge, training and practice skills currently available in their speciality area.
6. Identify target diseases and awareness amongst the population for Prosthodontic therapy.
7. Perform clinical and Laboratory procedure with understanding of biomaterials, tissue conditions related to prosthesis and have competent dexterity and skill for performing clinical and laboratory procedures in fixed, removable, implant and maxillofacial TMJ, esthetics Prosthodontics.

(Karnataka)

8. Laboratory technique management based on skills and knowledge of Dental Materials and dental equipment and instruments, management.
9. To understand demographic distribution and target diseases of Cranio mandibular region related to Prosthodontic including crown & bridge and implantology.

Attitudes

1. Adopt ethical principles in all Prosthodontic practice. Professional honesty and integrity are to be fostered. Treatment to be delivered irrespective of social status, caste, creed or religion of patient.
2. Willing to share the knowledge and clinical experience with professional colleagues.
3. Willing to adopt new methods and techniques in prosthodontics from time to time based on scientific research, which is in patient's best interest.
4. Respect patient's rights and privileges including patients right to information and right to seek second opinion.

Communication Abilities

1. Develop communication skills, in particular, to explain treatment option available in management.
2. Provide leadership and get the best out of his group in a congenial working atmosphere.
3. Should be able to communicate in simple understandable language with the patient and explain the principles of prosthodontics to the patient. He should be able to guide and counsel the patient with regard to various treatment modalities available.
4. Develop the ability to communicate with professional colleagues through various media like Internet, e-mail, videoconference, and etc. to render the best possible treatment.

PERIODONTICS

Objectives

The following objectives are laid out to achieve the goals of the course

Knowledge

1. Discuss historical perspective to advancement in the subject proper and related topics
2. Describe etiology, pathogenesis, diagnosis and management of common periodontal diseases with emphasis on Indian population
3. Familiarize with the biochemical, microbiologic and immunologic genetic aspects of periodontal pathology
4. Describe various preventive periodontal measures
5. Describe various treatment modalities of periodontal disease from historical aspect to currently available ones
6. Describe interrelationship between periodontal disease and various systemic conditions

PRINCIPAL
S.B. Patil Institute for
Dental Science & Research
NAUBAD, BIDAR-585402
(Karnataka)

7. Describe periodontal hazards due to estrogenic causes and deleterious habits and prevention of it
8. Identify rarities in periodontal disease and environmental/ Emotional determinates in a given case
9. Recognize conditions that may be outside the area of his Speciality/competence and refer them to an appropriate Specialist
10. Decide regarding non-surgical or surgical management of the case
11. Update him by attending course, conferences and seminars relevant to periodontics or by self-learning process.
12. Plan out/ carry out research activity both basic and clinical aspects with the aim of publishing his work in scientific journals
13. Reach to the public to motivate and educate regarding periodontal disease, its prevention and consequences if not treated
14. Plan out epidemiological survey to assess prevalence and incidence of early onset periodontitis and adult periodontitis in Indian population (Region wise)
15. Shall develop knowledge, skill in the science and practice of Oral Implantology
16. Shall develop teaching skill in the field of Periodontology and Oral Implantology

SKILL

1. Take a proper clinical history, thorough examination 01 intra orally, extra orally, medical history evaluation, advice essential diagnostic procedures and interpret them to come to a reasonable diagnosis
2. Effective motivation and education regarding periodontal disease maintenance after the treatment
3. Perform both non-surgical & education regarding periodontal disease, maintenance after the treatment
4. Perform both non-surgical and surgical procedures independently
5. Provide Basic Life Support Service (BLS) recognizes the need for and advance life support and does the immediate need for that.

Human values, ethical practice to communication abilities

adopt ethical principles in all aspects of treatment modalities. Professional honesty & integrity are to be fostered. Develop, Adopt ethical principles in all aspects of treatment modalities. Professional honesty & integrity are to be fostered. Develop Communication skills to make awareness regarding periodontal disease. Apply high moral and ethical standards while carrying out human or animal research. Be humble, accept the limitations in his knowledge and skill, and ask for help from colleagues when needed. Respect patients rights and privileges, including patient's right to information and right to seek a second opinion

CONSERVATIVE DENTISTRY

Objectives

The following objectives are laid out to achieve the goals of the course. These are to be achieved by the time the candidate completes the course. These objectives may be considered under the following subtitles.

Knowledge

At the end of 36 months of training, the candidates should be able to:

1. Describe aetiology, pathophysiology, periapical diagnosis and management of common restorative situations, endodontic situations that will include contemporary management of dental caries, management of trauma and pulpal pathoses including periodontal situations.
2. Demonstrate understanding of basic sciences as relevant to conservative / restorative dentistry and Endodontics.
3. Identify social, economic, environmental and emotional determinants in a given case or community and take them into account for planning and execution at individual and
4. community level.
5. Ability to master differential diagnosis and recognize conditions that may require multi disciplinary approach or a clinical situation outside the realm of the specialty, which he or she should be able to recognize and refer to appropriate specialist.
6. Update himself by self-study and by attended basic and advanced courses, conferences, seminars, and workshops in the specialty of Conservative Dentistry- Endodontics-Dental Materials and Restorative Dentistry.
7. Ability to teach, guide, colleagues and other students. Use information technology tools and carry out research both basic and clinical with the aim of his publishing his work and presenting the same at scientific platform

Skills

1. Take proper chair side history, exam the patient and perform medical and dental diagnostic procedures and order as well as perform relevant tests and interpret to them to come to a reasonable diagnosis about the dental condition in general and Conservative Dentistry - Endodontics in particular. And undertake complete patient monitoring including preoperative as well as post operative care of the patient.
2. Perform all levels of restorative work and surgical and non-surgical Endodontics including endodontic endosseous implants, as well as endodontic-periodontal surgical procedures as part of multidisciplinary approach to clinical condition.
3. Provide basic life saving support in emergency situations.
4. Manage acute pulpal and pulpo periodontal situations.
5. Have a thorough knowledge of infection control measures in the dental clinical environment and laboratories.

Human Values, Ethical Practice and Communication Abilities

1. Adopt ethical principles in all aspects of restorative and contemporary Endodontics" including non-surgical and surgical Endodontics. Professional honesty and integrity should be the top priority.
2. Dental care has to be provided regardless of social status, caste, creed or religion of the patient.
3. Develop communication skills- in particular to explain various options available management and to obtain a true informed consent from the patient.

(Karnataka)

4. Apply high moral and ethical standards while carrying on human or animal research .He / She shall not carry out any heroic procedures and must know his limitations in performing all aspects of restorative dentistry including Endodontics. Ask for help from colleagues or seniors when required without hesitation O Respect patient's rights and privileges including patients right to information.

ORTHODONTICS & DENTOFACIAL ORTHOPAEDICS

Objectives

The training programme in Orthodontics is to structure and achieve the following four objectives

Knowledge of

1. The dynamic interaction of biologic processes and mechanical forces acting on the stomatognathic system during orthodontic treatment
2. The etiology, pathophysiology, diagnosis and treatment planning of various common Orthodontic problems
3. Various treatment modalities in Orthodontics preventive interceptive and corrective.
4. Basic sciences relevant to the practice of Orthodontics
5. Interaction of social, cultural, economic, genetic and environmental factors and their relevance to management of oro - facial deformities
6. Factors affecting the long-range stability of orthodontic correction and their management
7. Personal hygiene and infection control, prevention of cross infection and safe disposal of hospital waste, keeping in view the high prevalence of Hepatitis and HIV and other highly contagious diseases.

Skills

1. To obtain proper clinical history, methodical examination of the patient, perform essential diagnostic procedures, and interpret them and arrive at a reasonable diagnosis about the Dentofacial deformities.
2. To be competent to fabricate and manage the most appropriate appliance - intra or extra oral, removable or fixed, mechanical or functional, and active or passive - for the treatment of any orthodontic problem to be treated singly or as a part of multidisciplinary treatment of orofacial deformities.

Attitudes:

1. Develop an attitude to adopt ethical principles in all aspects of Orthodontic practice.
2. Professional honesty and integrity are to be fostered
3. Treatment care is to be delivered irrespective of the social Status, cast, creed or colleagues
4. Willingness to share the knowledge and clinical experience with professional colleagues
5. Willingness to adopt, after a critical assessment, new methods and techniques of orthodontic management developed from time to time based on scientific research, which are in the best interest of the patient
6. Respect patients rights and privileges, including patients right to information and right to seek a second opinion
7. Develop attitude to seek opinion from allied medical and dental specialists as and when required

Communication skills

1. Develop adequate communication skills particularly with the patients giving them various options available to manage a particular Dentofacial problem and to obtain a true informed consent from them for the most appropriate treatment available at that point of time.
